

# AUDIO CONFERENCE EXCHANGE

## ACE

The ACE is an affordable four or eight port audio conference bridge designed for departmental or small office teleconferencing applications.

The superior amplification and equalizer circuitry enables you to leverage your existing phone system conference call capability by linking it and the ACE together. By linking your PBX 4 port conferencing with the ACE, you can conference 6 to 10 parties.

### APPLICATIONS

Business Meetings  
Training Sessions  
Interviews  
Church Service for shut-ins  
Universities-Classrooms  
City Council-Government  
Radio-TV Talk shows
